

Freedom of Speech

Freedom to Move – Don't accept being a slave to your desk! The BW 900 uses the new Bluetooth® Class 1, which allows you to roam up to 100 meters away from the base station, attached to your desk phone. For even more freedom to move, redirect calls and/or toggle to your cell phone. With 10 meters range to all Bluetooth® supported tools, whenever your mobile phone is with you, the headset is within range. With your hands free, you can work at your desk, eat lunch in the cafeteria, drive a car or even work on your golf handicap while carrying on any phone conversation.

Freedom of Mind – BW 900 is a headset that frees your mind, because it thinks and works for you. Adaptive Intelligence listens to your surroundings as you move and adjust the volume accordingly. It also compensates for differences in the incoming signal, delivering a consistently comfortable volume in the level to your ear. Further, Adaptive Intelligence analyzes the content of the signal you hear, letting the voice pass through clearly, while suppressing other noise that can reduce speech intelligibility and inhibit communication. This same noise-reduction technology is applied to your voice before it is transmitted - so both parties in the conversation may hear with excellent clarity. The headset remembers your personal sound preferences. Should you choose to override the default settings for a given noise environment, the BW 900 will remember your preferences and apply them the next time it encounters a similar environment - providing communication experiences that are always suited to your specific taste.

Freedom of Choice – One headset does it all. Bluetooth Class 1 allows connectivity to all voice-enabled Bluetooth devices so that you can also connect to your mobile phone, record notes on your PDA or Skype colleagues around the world without changing headset. On an average day at the office you spend time on both desktop and mobile phones. With the touch of a button, you can seamlessly switch (toggle) between your office telephone and your Bluetooth-enabled mobile phone. Pure convenience.

The ultimate in wireless communications

Freedom of Speech

BW 900 – The first wireless office headset with Adaptive Intelligence and complete freedom of speech

NEW

A headset that frees your mind

reddot design award
winner 2006

A battery of digital signal processing we call **Adaptive Intelligence** enables the BW 900 headset to adapt constantly as you move. You experience clear, intelligible speech wherever you are. And since it takes two to talk, the BW 900 makes sure your voice comes through **loud and clear**. What's more, Adaptive Intelligence remembers your preferred individual settings in different **sonic environments**. This headset thinks for you. **Freeing up your mind.**
